

Introduction to the Gynecological and Obstetrical History

Dr. Steven R. Lewis, M.D.
Associate Professor, Department of Clinical Medicine
slewis10@nyit.edu

Do.
Make.
Heal.
Innovate.
Reinvent the Future.

Session Objectives

1. Identify and utilize the standard questions asked to female patients regarding their gynecological history from menarche through menopause
2. Identify and utilize the standard questions asked to non-pregnant female patients regarding their obstetrical history
3. Identify and utilize the standard questions asked to pregnant female patients regarding their obstetrical history, current pregnancy including postpartum
4. Describe the basics of a pap smear including indication for and how the screening test is performed

Gynecological and Obstetrical History Taking

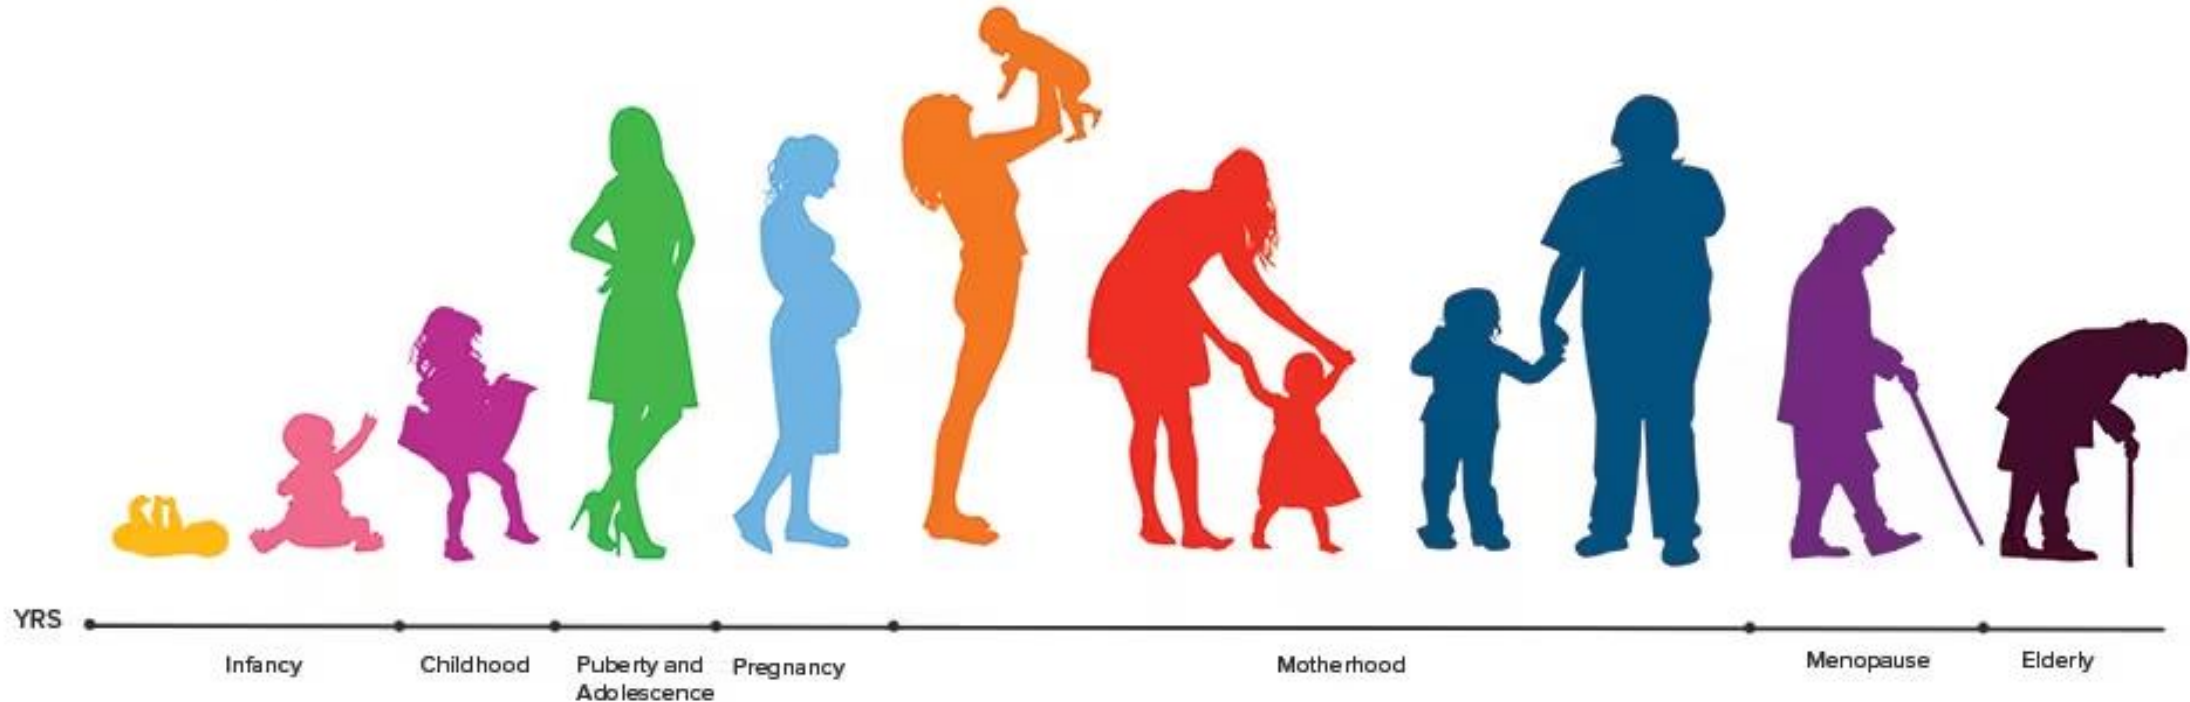

- ❖ The purpose of this lecture is to introduce to you what questions should be asked regarding a patients gynecological and obstetrical histories **only**
- ❖ We will **NOT** go over all of the general history questions to ask a patient as part of your history and physical exam

Gynecological and Obstetrical Histories

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

Different Stages of Life

Session Objectives

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

1. Identify and utilize the standard questions asked to female patients regarding their gynecological history from menarche through menopause

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

Why are we asking questions about the patients' gynecological history?

- Identify any areas of concern

- Inquire about the status of gynecological screening exams

This allows the physician to:

- Discuss sensitive topics

- Answer questions

- Provide patient education and anticipatory guidance

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What are the topics we should ask about?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Symptoms/Complaints

Common areas to address include:

- Breast, thyroid, vulvovaginal, pelvic, colorectal
- Are you having any problems with your breasts? (Review Breast section for more details)
- To ask about thyroid disorder inquire about:
 - Any recent weight gain/loss?
 - Any new onset fatigue?
 - Any hair loss or changes in hair?
 - Any cold/heat intolerance?
 - Any dry skin?
 - Any constipation?
 - Any heart palpitations?
 - Any mass in your neck?
 - Any mood swings/irritability?
- Are you having any... ?
 - discharge? (Nipples or Vaginal)
 - If so....
 - What color?
 - What consistency?
 - Any odor?
 - lumps, masses, or lesions? (Breasts or Vulvovaginal)
 - tenderness, pain, burning, dryness, or tingling? (Breasts, Pelvic, Vaginal, Rectal)
 - abnormal vaginal bleeding for you?
 - any bleeding from the rectum?

Gynecological History

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Menarche/Menstruation

- Menarche
 - How old were you when you started menstruating?
- Menstruation
 - When was the first day of your last menstrual period? (FDLMP)
 - How often do you have your menses?
 - How long does it last?
 - How heavy is your menses or flow? (# of pad or tampons used daily or hourly)
 - Any bleeding between your menses?
 - Any pain with your menses?
 - Any bleeding with sex or after sex?

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Menopause

If no longer menstruating:

When did you stop menstruating?

How old were you when you stopped menstruating?

Are you having any of the following symptoms:

Hot Flashes

Night Sweats/Sleep Disturbances/Insomnia

Vaginal Dryness/Irritation/Dyspareunia

Urinary Frequency/Urgency/Nocturnal Enuresis

Depression/Mood Swings

Difficulty Concentrating

Change in libido

Are you now having any times of vaginal bleeding/spotting?

Assessing for postmenopausal bleeding

Gynecological History

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Breast

Have you noticed any...?

- Problems?
- Lump or mass...? If so...
 - Where?
 - Any tenderness or pain? If so...
 - Where?
- Skin changes?
- Nipple problems...?
 - Discharge...? If so...
 - Which breast or both?
 - With compression or spontaneous?
 - Color?

Do you perform a breast exam (or breast awareness)?

When during your cycle?

How often?

How do you perform?

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Pap Smear

Have you ever had a pap smear? If so..

- When was your last pap smear?
 - Was it normal?
- Have you ever had an abnormal pap smear? If so..
 - When?
 - What was the abnormality?
 - Did you have any procedures?
 - (i.e. biopsy, LEEP, Cold Knife Cone, Hysterectomy, etc.)

Gynecological History

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Mammogram

Have you ever had a mammogram? If so..

- When was your last mammogram?
 - Was it normal?
- Have you ever had an abnormal mammogram? If so..
 - When?
 - What was the abnormality?
 - Did you have any follow up for the abnormality?
 - Did you have any procedures?
 - (i.e. biopsy, lumpectomy, mastectomy, etc.)

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Sexual Activity

Make sure you are in an appropriate setting (i.e. any family members or other individuals in the room?), non-judgmental and preface questioning (i.e. I ask the following questions to all my patients)

Have you ever been sexually active?

Are you currently sexually active?

- Include oral, vaginal, and/or anal sex (may include asking about vagina-to-vagina, penis-to-penis, and any use of sexual toys)

What is your sexual orientation?

How many partners do you currently have?

How many lifetime partners have you had?

Do you prefer sex with men, women including transgender men or transgender women, or any combination?

Do you use protection?

Any history of STIs?

Any concerns for any STIs today including HIV?

Any problems with intercourse?

Any problems with arousal or getting aroused?

Any problems with orgasm or achieving orgasm?

Gynecological History

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Contraception

Are you currently trying to prevent pregnancy?

If so..

- What method are you using? (oral contraceptive pill, injection, vaginal ring, intrauterine device, implant, abstinence, barrier, permanent sterilization)
- Are you using it as prescribed?

If not...

- Do you understand you could become pregnant? (except if they or their partner have had permanent sterilization)
- Are you taking a prenatal vitamin?

Gynecological History

What questions should we ask?

Symptoms/Complaints

Menstrual Cycle

Menopause

Breast

Pap Smear

Mammogram

Sexual Activity

Contraception

Family History

Family History

Any family history of the following:

- Breast Cancer
- Ovarian Cancer
- Uterine Cancer
- Cervical Cancer

Session Objectives

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

2. Identify and utilize the standard questions asked to non pregnant female patients regarding their obstetrical history

Obstetrical History

Currently Non Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

Why are we asking questions about the patients' obstetrical history?

To obtain general health information and identify any previous surgical interventions

Some medical conditions may start in pregnancy and continue throughout their lifespan

This allows the physician to:

Have a better overall picture of a patients health and surgical history

Obstetrical History

Currently Non Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Pregnancy history

Pregnancy History

Have you ever been pregnant?

If so...

How many times?

How many live births? Are they still living?

How were they born?

(vaginal or C-section; any use of vacuum/forceps)

At what gestational age did you deliver?

Where did you deliver?

Any complications with the pregnancy?

Any complications with the delivery?

Have you ever had a spontaneous miscarriage?

Was intervention needed like medicine or surgery?

Have you ever had an elective termination?

Was it performed with medicine or surgery?

Session Objectives

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

3. Identify and utilize the standard questions asked to pregnant female patients regarding their obstetrical history, current pregnancy including postpartum

Obstetrical History Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

Why are we asking questions about the patients' obstetrical history?

In obstetrics, past history can be a good indicator of the future

Identify any areas of concern that may require special testing, added surveillance or consultations

This allows the physician to:

- Discuss sensitive topics

- Answer questions

- Provide education and guidance

Obstetrical History Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What are the topics we should ask about?

- Menstrual and pregnancy confirmation

- Pregnancy history

- Symptoms/Complaints

- Concerns/Attitude

Obstetrical History

Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Menstrual and pregnancy confirmation

Pregnancy history

Symptoms/Complaints

Concerns/Attitude

Menstrual and Pregnancy Confirmation

When was the first day of your last menstrual period?

Are your menstrual cycles regular in timing?

Have you confirmed the pregnancy with a urine pregnancy test?

If so...

When?

Have you had an ultrasound for this pregnancy?

If so...

When?

What was the findings?

Obstetrical History

Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Menstrual and pregnancy confirmation

Pregnancy history

Symptoms/Complaints

Concerns/Attitude

Pregnancy History

Have you ever been pregnant?

If so...

How many times?

How many live births? Are they still living?

How were they born?

(vaginal or C-section; any use of vacuum/forceps)

At what gestational age did you deliver?

Where did you deliver?

Any complications with the pregnancy?

Any complications with the delivery?

Have you ever had a spontaneous miscarriage?

Was intervention needed like medicine or surgery?

Have you ever had an elective termination?

Was it performed with medicine or surgery?

Obstetrical History

Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Menstrual and pregnancy confirmation

Pregnancy history

Symptoms/Complaints

Concerns/Attitude

Symptoms/Complaints* not an exhaustive list

Have you had any of the following symptoms:

Vaginal bleeding?

Nausea and vomiting?

Breast fullness and tenderness?

Fatigue and urinary frequency?

Vaginal discharge?

Obstetrical History

Currently Pregnant

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Menstrual and pregnancy confirmation

Pregnancy history

Symptoms/Complaints

Concerns/Attitude

Concerns/Attitude

Assess what are the mother's concerns/attitude:

Was this pregnancy planned?

How do you feel about the pregnancy?

Excited, Scared, Concerned

Do you plan to keep the baby and continue the pregnancy?

Do you have a support network?

Is the father of the baby involved?

Family?

Friends?

Obstetrical History

Postpartum Visit

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

What questions should we ask?

Postpartum

Postpartum

How are you doing?

Are you having any fevers, abdominal pain or vaginal discharge?

Have you started your menses yet?

Are you breast feeding/bottle feeding or both?

Are you having any problems with feeding?

Are you having any problems with your breasts?

(Looking for issues like mastitis)

Are you having any signs/symptoms of depression/anxiety?

(Edinburgh Postnatal Depression Scale given to patient)

Do you have good support around you?

Have you been sexually active since delivery?

Are you interested in contraception/family planning?

Make sure they follow up with their provider for continued GYN care and health screenings (i.e. pap smears, etc.). May also provide a return to work note, if needed.

SOAP Note

Remember Documentation?

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

- **Subjective**
 - What the patient (or family, caregiver, etc.) tells you
 - The patient is the frame of reference – you write down his/her comments or opinions in this section
 - Components:
 - Chief complaint(s)
 - History of present illness
 - Medical history
 - Surgical history
 - Obstetric/gynecologic
 - Psychiatric history
 - Medications
 - Allergies
 - Social history
 - Family History
 - Healthcare maintenance
 - Review of systems

Obstetric/Gynecologic

Gynecologic

- Menstrual cycle
 - Age of onset, length of cycle, cycle regularity, amount of bleeding, last menstrual cycle (LMP), associated symptoms, Age of menopause

Example:

Menarche at 12 y/o, 30-day cycles, menses for 5 days, normal bleeding, minor dysmenorrhea, no blood clots

- Last pap smear/mammogram and results. Any history of abnormal tests?

Obstetric

- Gravida (G) = How many pregnancies
- Para (P) = final outcome of the pregnancy
 - In this order: Full term, pre-term, aborted or miscarried, number of living children
- Written as G # P # # # #,

Example:

G4P2113

Session Objectives

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

4. Describe the basics of a pap smear including indication for and how test is performed

Source: Course Syllabus

Introduction to the Pap Smear

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

The Basics:

- Developed by George Papanicolaou

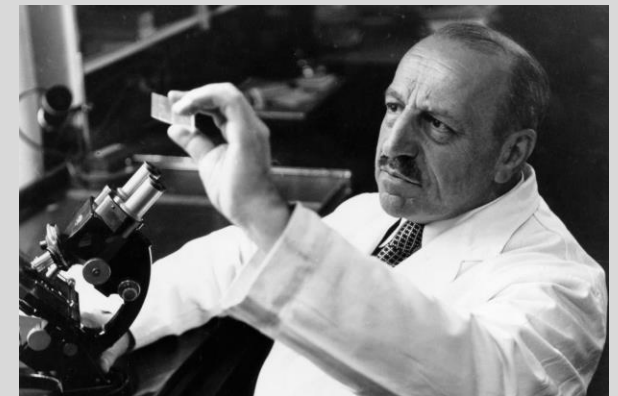

- Used as a screening tool for cervical cancer

- American Society for Colposcopy and Cervical Pathology (ASCCP)

 - Provides guidelines on screening and follow up management

 - Begin screening at age 21

- Most cervical cancers caused by the human papilloma virus (HPV)

Credit: American Cancer Society

George Papanicolaou (1883-1962)

Introduction to the Pap Smear

**NEW YORK INSTITUTE
OF TECHNOLOGY**

College of Osteopathic
Medicine

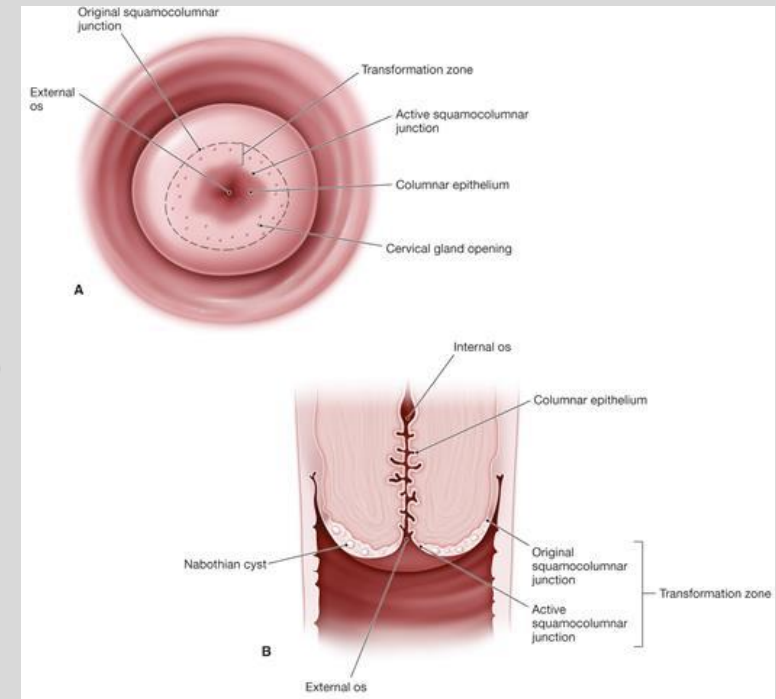

The Anatomy/Pathology:

The cervical epithelium consists of 2 types of cells:

- Columnar (glandular) – line inside of cervical canal

- Squamous (stratified non keratinizing) – line outside of cervix

The area where these two meet is called the squamocolumnar junction (SCJ)
SCJ is where 90% of cervical neoplasia arise

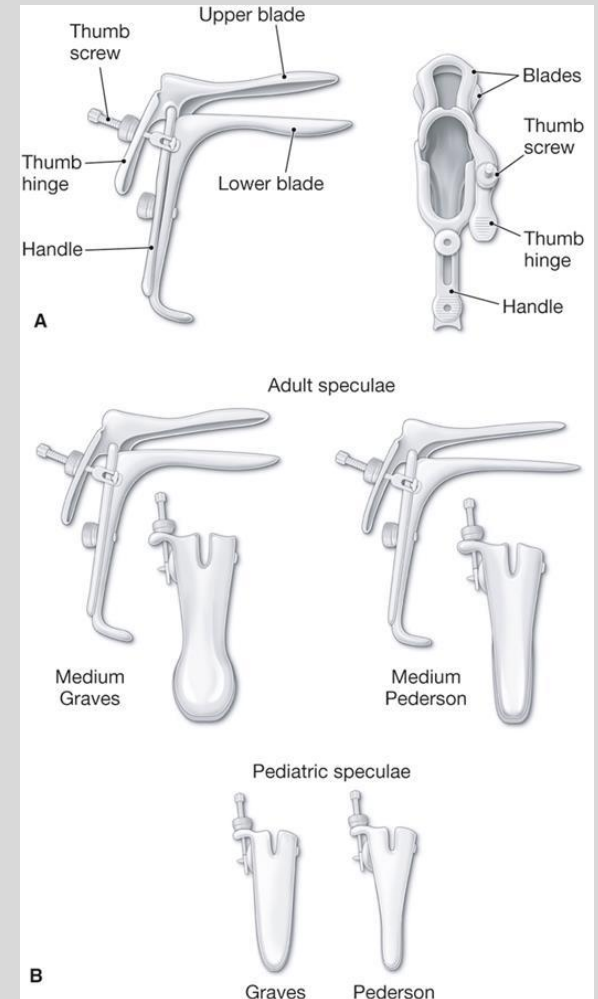

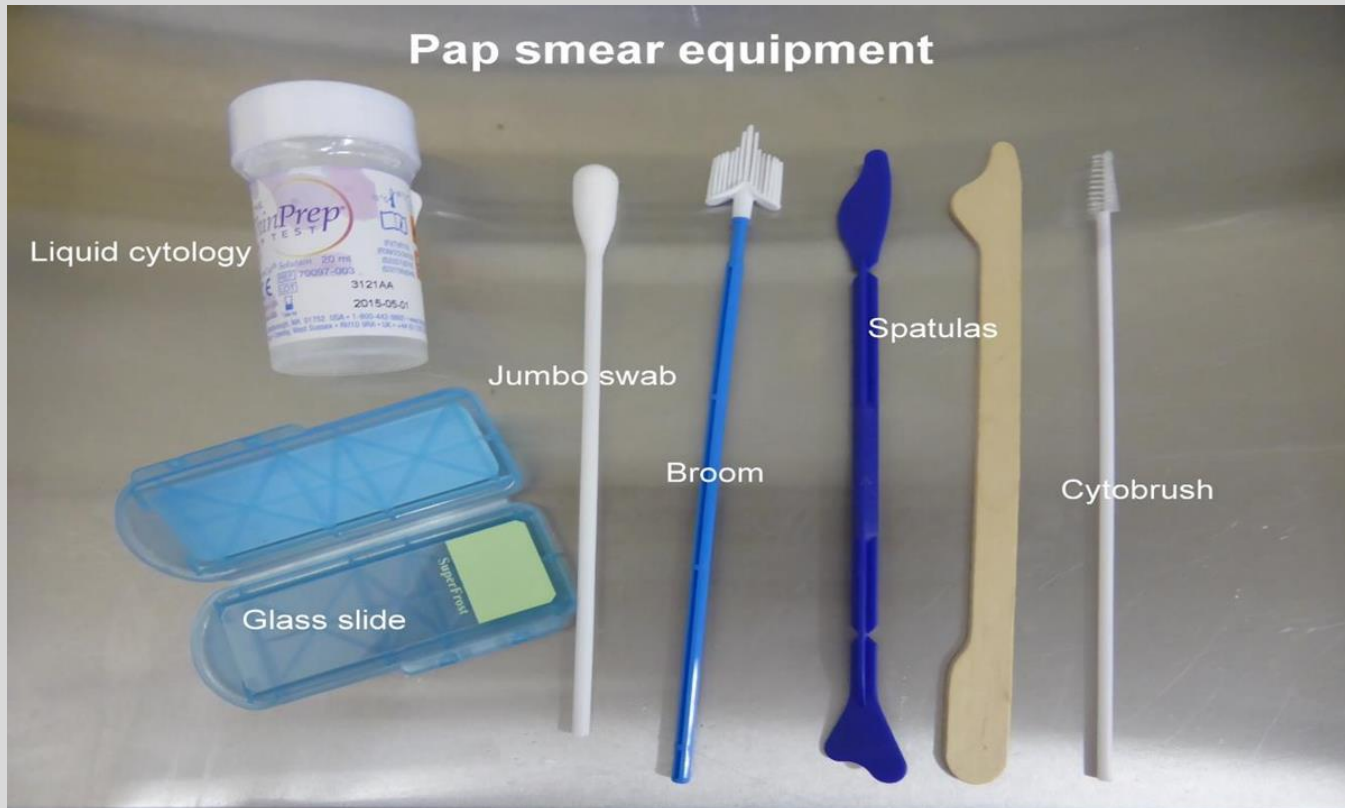

(Based on Berek JS. Berek and Novak's Gynecology. 15th ed. Lippincott Williams & Wilkins; 2011.)
